

PHOS ACCUSED OF SABOTAGE

A.C.E. Reveals Army Air-Corps Training Plans

20 More Men Get Orders To Report For Meteorology Service

The Office of the Armed Services Representative at the Institute last week received information from the American Council on Education on the plans of the Army Air Forces for the members of their enlisted reserve corps which is now being called to active duty.

The Army Air Forces Enlisted Reserve Corps members, who have qualified for Aviation Cadet Training, will be called to active duty between now and April 1, according to the American Council on Education. A large number will be required to report between February 15, and February 20. College students will be allowed to complete the term which was in progress on December 31, 1942, before being called. This, according to Professor Mitsch, has no bearing on men at Technology, as the term which this

Debating Society To Give Exhibition

Federal Union Plan To Be Debate Subject

The M.I.T. Debating Society will hold an exhibition debate before the Royal Arcadium society on Monday evening, February 22, in St. Rose Hall, 17 Worcester St., Boston. Although it was formerly announced that this debate would take place on February 15, the date has been definitely set for February 22.

George M. Keller, Jr., '45, and John W. Colton, '45, will speak on the affirmative side of their subject, "Resolved, that the United States should take the lead in forming a permanent federal union of the world," while Raymond Redheffer, '43, and John L. Rummer, '43, will present the arguments for the negative side.

On February 26, the Debating Society will participate in a debate with a team from Boston College. The subject will be the federal union question, and Technology, represented by James M. Smith, '46, and Jack L. Uretsky, '45, will uphold the negative side.

The Debating Society has announced that a member of the Junior Board will be on hand in the Society's office in the basement of the Walker Memorial Building every week from Monday to Friday, and that anyone interested in learning more about debating at Technology is invited to stop in.

Spanish Club Will Hold Dinner On February 26

The Spanish Club will hold its monthly dinner on Friday, February 26, it was announced yesterday. The dinner will be held at 6:30 P.M. in the Du Barry Restaurant, it was further announced, and the matter of coming elections will be discussed.

It is important that all members be there, as there will be an important announcement concerning the elections.

EXHIBIT A

Sergeant of the Guard lulled to sleep in the line of duty by seditious literature vended by Voo Doo, undergraduate humor magazine. This photograph was sent to The Tech by a United States Army Officer in Africa, and figures in the charges brought on Voo Doo by The Tech.

EDITORIAL

WALKER MEMORIAL'S TROJAN HORSE

Voo Doo stands accused. The low journal adds another iniquitous page to the many already staining its unclean record. This time playing for stakes that cannot but appall the most disinterested of persons, Voo Doo has included conspiracy with traitorous intent in every issue. One can almost hear Rommel smirking, "Hah, we've got the Afrika Corps to meet the Americans at the front and Voo Doo to demoralize them from the rear."

From Africa came Lt. Col. Nelson's appeal, "This horrible influence, can't something be done about it," and to Col. Nelson our reply goes out, "Sir, we will act. Voo Doo will be stamped out like the Japanese beetle and the German measles."

Our problem was one that would have floored less valiant men. First we thought of allowing Voo Doo to stand upon its own legs and thus totter and crumble to dust, but we were aware of the further consequence so common among invertebrates of the lower orders, that Phos might regenerate from its sensorimotor dust in its dank primordial headquarters, and reemerge

Institute Alumni Among Leaders In Armed Services

Aside from being noted in their respective fields, the alumni of Technology have distinguished themselves in the armed forces of the United States. According to Dr. Karl T. Compton, there were 3,702 alumni in the armed forces as of January 30, 1943.

Of these 3,702 men, 2,552 are in the Army, 1,095 in the Navy, 28 in the Marines, and 27 in the Coast Guard. This number has been swelled by several hundred more, as many of the members of the Class of 1943 have already entered the service, and some of the undergraduates have already been called to the colors. This means that one

Juniors May Order Rings Next Thursday & Friday

The Senior Ring Committee has definitely fixed next Thursday and Friday, February 25 and 26, as the dates on which the rings may be ordered.

A representative of the I. G. Balfour Company will be present in the Main Lobby of Building 10 between the hours of 11:00 A.M. and 3:00 P.M. on those days. She will take orders and ring sizes, and have on display the selection of rings approved by the Alumni Council and the Institute Committee.

Solons Discuss Technique Issue

Picton Approved At Yesterday's Meeting

A discussion of the possibility of publishing Technique was held by the Institute Committee after its regular meeting yesterday afternoon. They discussed the likelihood of a volume for the Class of 1944 meeting with financial success, and with the favorable acceptance of the class. The possibility of publishing a small size volume was discussed.

Before the meeting adjourned, the Institute Committee was also asked for its opinions on the possibility that it might be necessary to change The Tech to a weekly paper.

The meeting was opened with the reading of the minutes of the last meeting, and the minutes of an Executive Committee meeting held last Monday afternoon. The only regular report which was given was that of the Senior Ring Committee, given by Robert S. Meny, '44, chairman of the committee. He said that he had inserted several boxes in The Tech, and had made arrangements with the L. G. Balfour Company to sell the rings.

The first motion to come up, was the changes in the constitution of the Baton Society. This motion had been tabled at the last meeting as no member of the Baton Society had been present to explain the changes. Yesterday, however, they

Course XI To Be Discontinued By Corporation Order

New Option In Course I Is To Specialize In Sanitary Engineering

The Executive Committee of the Corporation has announced a number of changes in the curricula of the Departments of Sanitary Engineering and Public Health Engineering, according to Dr. Karl T. Compton, President of the Institute.

At the time the Visiting Committee of the Department of Biology and Public Health recommended that the awarding of degrees in Public Health be discontinued, it likewise urged that a study be made of the Institute's programs in Sanitary Engineering and Public Health Engineering and of the possibility of consolidating or otherwise revising these two courses to prevent duplication. A similar recommendation was also made by the Visiting Committee of the Department of Civil and Sanitary Engineering.

Committee Decides to Study Course XI

In accord with these recommendations, Dr. Compton appointed a committee of administrative officers to carry out this study. This committee, after consultation with practicing engineers, concluded that the undergraduate course in Public Health Engineering should be discontinued, that undergraduate course XI, Sanitary Engineering, should be discontinued and undergraduate courses in Sanitary Engineering be offered as group electives in Civil Engineering leading to the S.B. degree in Civil Engineering, and that a graduate program leading

(Continued on Page 4)

The Tech Will Observe Washington's Birthday

As The Tech's publication schedule was planned prior to the Faculty's abolition of the Washington's Birthday Holiday next Monday, there will be no issue on the following day. Thus despite the fact that the Institute will not observe the birthday of the father of our country, The Tech will hold the day as a holiday in his honor.

Unquestionable Evidence Against Infamous Rag

Accused of seditious action in its continuing attempts to destroy the morale of our Armed Forces both here and abroad, Voo Doo, alias Phosphorus, will be brought to the bar of justice of public opinion to face the charges brought by The Tech.

The Tech charges that Voo Doo did willfully and with hostile intent cause to be printed such matter which it purported to call humor and did further cause to have such aforesaid printed matter distributed far and wide; and furthermore, did cause members of the armed forces of the United States to become demoralized and forsake the line of duty.

Documentary Evidence

Backing up its charges with authenticated documents received from correspondents in the field, The Tech has called upon the student body of the Institute to view Voo Doo in the light of these revelations and to act accordingly, to help strike down the culprits.

The indictment, one of the most sweeping since William Power Maloney charged thirty-three with sedition, centers its allegation on the

(Continued on Page 4)

Voo Doo Comes Out Next Thursday

To Be No Special Theme In February Magazine

Despite the fact that they have been accused of sabotage, Voo Doo plans to have an issue next Thursday according to Gerald Dennehy, '44, General Manager of the publication. This issue according to William Katz, '45, Literary Editor, will have no definite theme, as has been the policy of the magazine for the past issues.

The principal new feature in the issue will be a section of "Fond Memories" containing items from Voo Doo of the 1920's and 30's. These excerpts, according to Katz, had to be very carefully selected, as some of the old material could not be republished.

Gone from Voo Doo for the first time this year is Murgatroyd, the Tech Coed, who in the last issue joined the WAAC's. Voo Doo has therefore announced that Murgatroyd will not be back for the duration.

The frontispiece of the magazine this month will be of Miss Maria Montez, who has recently been starred in "Arabian Nights". There will be a regular "Sideview of the Month". This time it will be concerned with a dapper, well dressed member of the Junior Class.

As a special feature there will be a story about F. Rogers of the Twenty-fifth Century, brother of the famous comic strip character. The story will deal with this man's excavations in the Great Cambridge Desert.

The Trial of Yussel Klein will also be included as well as a poem about those things which are called milk shakes in Boston. This poem expresses the opinions of people from other parts of the country where a milk shake is a milk shake and not a frappe.

(Continued from Page 1)

more subversive than before. To avoid this outcome we rejected our original plan in favor of another.

Recalling from the pages of our illustrious predecessors on The Tech that once before Voo Doo raged rampant and could be subdued only by exposure to the clean healthful air of public scrutiny which brooks no evil, we contemplated the result. Once exposed Phos subsided into a quiescent periodical which after considerable improvement became fairly readable.

Our hope, then was to be able to repeat this performance. We have presented the evidence as we have found it, making not much of an effort to beat a quite dead horse too vigorously. Relying on the intrinsic common sense allotted to all men by J. J. Rousseau, a Frenchman long dead and hence not the slightest bit prejudiced in this case, we feel that one verdict and only one can truthfully be returned by you the students who are at once the judge, jury and grand inquisitors.

The evidence is reprinted elsewhere in The Tech. We have refrained from calling in governmental authorities for much the same reason that the F.B.I. does not call us into consultation. They have their problems and we have ours—and ours is Voo Doo.

Voo Doo's lame defense will probably rest upon the cry for freedom of speech, following the line of the erstwhile American Fuehrer, Wm. Dudley Pelley, but we maintain that sedition is abuse of freedom and hence is liable to punishment.

Before Voo Doo launched its world wide campaign of demoralization in the guise of humor, undergraduate indifference at the Institute was able to cope with the situation. This colossal indifference was directly responsible for the fact that Voo Doo's which had been read were vended as rare editions and two that were purchased have become true collector's items. The third, unfortunately, was scuttled with the Graf Spee.

Throughout its history then, Voo Doo has remained innocuous. This happy situation does not exist at present and hence we feel that our efforts to bring the culprits to their just ends are justified.

Gentlemen, stand back. Murgatroyd pass us that noose first!

(Editor's Note:—The following edit, which appeared recently in The California Tech, describes perfectly the situation here. Accordingly we reprint it verbatim.)

NEWS AND RUMOR

Tech students are now living in an atmosphere of severe uncertainty about the future, with numerous newspaper reports and pure rumors, many of them directly conflicting, assailing us. In this situation, The — Tech feels obligated to make a statement of policy regarding the stories which appear on its pages.

The Tech is interested in printing facts, the statement of certain truth. Our space is restricted, and we do not have the room, available in metropolitan newspapers, for a complete digest of what various individuals have thought and said and unofficially announced. Concerning the policy and plans of the Army and Navy for Tech, we cannot consider an order official until the Institute has received notification from the representative of the ordering service.

We are making a particular effort to keep Techmen as closely and rapidly informed as possible of definite developments. Please do not be hasty in criticizing what may appear to be a sketchy account of Tech's wartime situation, for we believe and think you will agree with us that it is better to say nothing at all than to print untrue or misleading information.

Collegiate Roundup

by A. C. P.

Dartmouth college is opening a separate department of geography, in recognition of the global character of the war.

Geography department of Hunter college has expanded its spring semester course in map interpretation at request of the army map service.

University of North Carolina has established a college of war training, on a par with the other schools of the university, to train students above 16 years of age for front-line and civilian duty.

University of Wisconsin's 1942 football team performed before 316,000 persons during the season's 10 games.

More than 100 faculty members and administrative officers have resigned their positions at Princeton university to enter war service. Registration in British universities has fallen from the 1939 figure of 50,000 students to 37,000. The number of women enrolled, 11,000 remains the same.

More University of Texas men students are going out for intramural sports this year than ever before, despite a smaller number of enrollees.

H. G. Wells, historian, is working on a thesis for a master's degree in science at London university.

Forty thousand club women have united to demand that the Minnesota legislature provide a new mechanical and aeronautical engineering building for the University of Minn.

The University of Texas student employment bureau last year found part-time work for 2,155 students paying them a total of \$140,000.

A University of Kentucky student newspaper survey concludes that women students are "exhibiting more spunk, courage and bravado than the manly male" under war conditions.

Having outgrown its office space occupied since 1922, headquarters for the University of Michigan ROTC is now housed in a former fraternity house.

Providence (R. I.) college recently conferred the honorary degree of doctor of laws on President Quezon of the Philippines.

A new method of rebuilding faces with celluloid, under living skin, has been developed at Tulane university school of medicine.

More than \$20,000,000 has been willed Northwestern university by the late Walter Patton Murphy of Chicago, railroad equipment inventor and manufacturer.

New York City college's institute of film techniques is offering a new course in audience reaction.

Pre-flight training has been added to the course of study at Western Maryland college.

Iowa Wesleyan college is inaugurating an extensive course in air transportation to prepare its students for positions in the coming flying age.

Success as a teacher shows little correlation to college grades, campus leadership, intelligence test records, knowledge of contemporary affairs, or tolerance, according to experiments at DePauw university.

Students of the College of New Rochelle (N. Y.) have enrolled in a class in postwar rehabilitation and reconstruction.

For the first time, mid-year entering freshmen at Lafayette college have their own identity as a college class.

A new course in nursing training leading to the degree of bachelor of science in nursing is offered by Bates college, Maine.

Drexel Institute of Technology, for the first time, is accepting women in all departments of the school of engineering.

The University of Buffalo has established a course in military German.

Tulane university announces a new series of publications, titled "Middle American Research Records", by its middle American research institute.

High school students who have completed the junior year and who can pass entrance tests may enter Denison university, Granville, Ohio, under a new ruling.

Students from the public administration course at Elmira college recently spent a week in Washington to receive a more realistic picture of what the government is like.

Keuka college has announced a new three-year accelerated course to train nurses.

Eleven new war preparation courses in seven departments have been added to the curriculum of Bates college.

Mansfield State Teachers will now admit to all departments students who have completed all but the last half-year of the standard secondary school course.

Two new courses to train personnel to care for children of women workers in defense industries have been announced at Pennsylvania State college.

Newspapers Have Gremlins, Too —In Case You Hadn't Noticed

By A. C. P.

For the millions who are slightly pixy-minded, the discovery of the gremlins, those devilish little sprites who mess things up for the fliers of the royal air force, has provided one of the major excitements of the war. Come to think of it, it is as easy to believe in gremlins as in banshees and leprechauns or in any of the creatures that dance across the pages of that fine Irish writer, Mr. James Stephens.

But gremlins were not enough. The alert though sometimes exasperating minds that conduct the radio industry have come forward with their set of cute little people. These are called grohms. One type of grohm, the slobnik, "louses up" the copy of scrip writers; another, the laffnix, flattens the lines of comedians; still another, the foobus, makes noises in microphones. This, also, is an interesting discovery, sure to provide much merriment among the people of radio, to whom laughter comes rather easily.

Journalism, Too

But why the excitement? Journalism itself has long had its own set of little rascals who for generations have messed up one thing or

another. Various phenomena observed in newspaper offices leads to the inescapable conclusion that journalism is haunted by as pernicious a set of strange folk as ever harassed an airplane pilot or made life in a radio studio miserable.

These troublemakers have been tentatively named mergenfellers, and they come in many guises. Most pookish of the lot, perhaps, are the eternally playful twins, etaoin and shrdlu, who have great fun sliding up an down the keyboards of linotype machines. They can inject a note of nonsense and confusion into the most solemn discourse.

Slantites Worst

There are the slantites, the tiniest and meanest of them all, who have been known to bite all the members of a newspaper staff, from publisher to copy boy, giving them a depressing low-grade infection known as slantitis. Victims are afraid of straight facts; they hoot at the ideal of objectivity; everything they touch must be given a "slant" or an "angle." In time they begin to walk sideways. The final result is almost always fatal.

Then there are the fixpoxies, who are responsible for putting the pic-

(Continued on Page 4)

Reviews and Previews

KEITH MEMORIAL — Arabian Nights, starring the Maria Montez, has been held over for a third week. The cast includes Jon Hall and Sabu, for the benefit of those who haven't seen it yet. The companion film is **Strictly in the Groove**, with Ozzie Nelson and his orchestra. The latest Donald Duck cartoon is included in the program.

KEITH BOSTON—The much advertised Lou Walter's **Latin Quarter Revue** opened yesterday on the stage, including sixty famous night club stars. First reports were complimentary. The film attraction is **Commandos Strike at Dawn**, starring Paul Muni. Sounds like an unusual role for him.

METROPOLITAN—The **Black Swan**, with Tyrone Power and Maureen O'Hara has been held over for a second week. The co-feature is **Street of Chance**. Next Monday night will be the final Boston appearance on the Met stage of **Dr. I.Q.** and his radio program—some of Tech's so-called smart boys should make some money out of that show before it leaves town.

LOEW'S STATE AND ORPHEUM—Another new show opening yesterday was **Andy Hardy's Double Life**, latest in the never ending series starring the Rooney kid. Sometimes we think we'd like Caltech better than M.I.T., especially after looking at Rooney's playmates, then taking a close look at the surroundings. **Power of the Press** (what's that?) is the second picture.

PARAMOUNT AND FENWAY—**Star Spangled Rhythm**, starring M-G-M and **Truck Busters**. Ho-hum. **FINE ARTS**—Presents for the "definitely last week" the memorable saga "G.W.T.W." or **Gone With the Wind**.

MAJESTIC — Walt Disney's much-heralded South American feature **Saludos Amigos**, disappointingly short, but plenty funny while it lasts. **Squadron Leader X**, story of a German flier in the R.A.F., offers enjoyable wartime adventure—for those as likes it.

Journalism Schools Unable To Supply Enough Graduates

Nation's Newspapers

Affected Greatly

By Manpower Shortage

By A. C. P.

Despite greatly accelerated programs, American journalism schools will find it difficult to meet demands of daily and weekly newspapers in replacements needed to fill wartime vacancies, it was revealed at a recent meeting of the National Council on Professional Education for Journalism in Chicago.

It would appear that woman reporters, copyreaders and even editors may well be the salvation of newspapers confronted with manpower shortages which apparently are destined to increase, rather than diminish during 1943. This was indicated as a possibility by reports, based on surveys covering newspaper personnel shortages in the daily and weekly field.

Many Vacancies

At the time of the meeting there were 2,187 vacancies on daily newspaper and 1,550 estimated jobs open on weeklies. It was predicted that within the next six months there would be 4,100 additional replacements needed in the daily field and at least 2,000 more vacancies on weeklies. "And there will be only about 1,000 students, mostly women, who will be graduated this year from the nation's 33 schools of journalism," commented Dean Kenneth E. Olson, Medill School of journalism, Northwestern university, secretary-treasurer of the national council.

Dean Olson's survey of daily news-

Cindermen Face Brown Today At Providence N.E.A.A.U. Meet Is Mon.

Championships To Be Held At Medford Track

On Saturday the Tech track team will meet Brown University in a meet at Providence. The Beaver men will be well accustomed to the track since it was constructed from the same blueprints as the Tech outdoor board track. According to coach Oscar Hedlund the Brown team is no pushover with Dwyer, who recently set a new record in the 300 yard dash in a meet with Holy Cross and several other good men. The meet is scheduled for 2:30 and the team will leave Boston on the 12 o'clock train. The following men will make the trip:

High hurdles—Beecher, Pyle and McKee; 40 yard dash—Meny, Seferian and Cavicchi; 300 yard dash—Meny, Seferian and Cavicchi; 1000 yard dash—Ziegler, Cassidy and Henze.

600 yard run—Bryant, Bailey and Goldie.

1 mile—Joseph, Knapp and Spear. Shot put—Dodds, Walke and Artely.

High jump—Adams, Pasfield and Pyle.

On Monday at 1 P.M. the team will compete in the New England Indoor Track and Field Championships to be held at Tufts in the Cousin Indoor gym. The following men will compete in this meet:

35 lb. wgt.—Wareham, Dodds and Fester.

High jump—Adams, Pasfield and Pyle.

Pole vault—Hildebrand, Ashley.

Shot put—Dodds, and Artely.

50 yard dash—Meny, Cavicchi, Finner and Seferian.

50 yard high hurdles—Beecher, McKee and Pyle.

50 yard low hurdles—Beecher, McKee and Pyle.

600 yard run—Bryant, Bailey, Goldie and Wood.

1,000 yard run—Ziegler, Cassidy, and Henze.

3 mile run—Joseph and Knapp.

1 mile run—Spear.

1 mile relay—Meny, Bryant, Bailey and Goldie.

Boys' Work Group Will Hold Smoker

Expecting a large number of interested freshmen to attend, the Boys' Work Division of the Technology Christian Association has announced that it is to hold a smoker at 5:00 P.M. on Wednesday, February 24, in the Litchfield Lounge.

Lewis H. Geyer, '43, head of the division, said that as yet the speakers have not been definitely decided upon. However, they are to be announced shortly.

Refreshments will be served at the affair, and all persons who desire to partake in settlement house work, or other forms of boys' work, are urged to attend this smoker. The organization of the Boys' Work Division will be explained, and the various fields in which the workers participate will be enumerated. The smoker is not limited to freshmen, and it is hoped that a large number of upper classmen will attend.

SPORTS CALENDAR

Friday, February 19

Lacrosse Rally—Litchfield Lounge, Walker Memorial, 5:00 P.M.

Wrestling—freshmen vs. Roxbury Latin, 2:30 P.M., there.

Swimming—freshmen vs. Moses Brown, 3:00 P.M., here.

Monday, February 22

Track—varsity, N.E.A.A.U. Championships, Boston Garden.

Lacrosse Team To Hold Rally This Afternoon

Previous Experience Unnecessary Says Mgr. Redshaw Is New Coach

With many of the Institute's teams suffering from lack of interest, plans are going ahead for an active and enjoyable lacrosse season according to the managers of that sport. Plans for the campaign will be announced at a rally to be held tonight at Walker Memorial in Litchfield Lounge at 5:00 P.M.

The meeting will take the form of a combined bull session and pep talk with the new coach Lincoln Redshaw present. A large amount of new equipment has been purchased in preparation for the coming season which will get underway about April 6th when the team faces the Boston Lacrosse Club. All those interested in the sport are urged to come out for the rally since no experience is required for those who want to play.

Indoor practice in the Tufts cage is planned and will start in two weeks if arrangements for the use of the cage can be completed. Freshmen will be eligible for varsity competition this season as has been the practice in other schools and sports.

The schedule for the spring season is as follows for both the freshman and varsity teams. All home games will be played at Briggs Field.

Varsity

April 6—Boston Lacrosse Club, Here.

April 10—Tufts, Here.

April 17—Harvard, There.

April 21—Springfield, There.

April 24—Williams, Here.

May 8—New Hampshire, There.

May 21—Dartmouth, There.

Freshmen

April 17—Harvard Frosh, There.

April 23—Tufts Frosh, Here.

May 1—Andover, There.

May 8—Governor Dummer, There.

Sharpshooters Go To McGill Today For Match On Sat.

Near Record Score Of 1387 Is Registered In Recent Postal Match

Late this morning the Beaver sharpshooters departed for Montreal where they will engage the McGill riflemen in a shoulder to shoulder match on Saturday. The team will arrive in Montreal at about 10:00 o'clock tonight and will stay until Sunday. Those making the trip include Rosar, Smock, Corwin, Weisenthal (Cap't.), Dundon (Manager), Cantor, Woodworth and Levendahl.

Last year when the squad journeyed to McGill it was the first trip outside the country for any Beaver Rifle team. The members of both teams enjoyed an excellent weekend during which the Technology men were entertained at a C.O.T.C. dance.

During this week a postal match with the Coast Guard Academy has been in progress at the rifle range. Those participating in the postal match were: Rosar, Smock, Dundon, Corwin, Wood, Weisenthal, Cantor, Woodworth, Baldwin, and Levendahl.

Following are the results of a recent postal match held with Columbia University and Niagara University. The results of the other teams are not available as yet but the Tech total of 1387 (taking the five highest scores) was only 27 points short of school record of 1416 points.

	Total	Prone	Kneel	Stand
Woodworth	268	100	90	78
Weisenthal	285	99	95	91
Wood	274	99	93	82
Cantor	271	99	92	80
Dundon	279	100	96	83
Rosar	264	97	88	79
Smock	278	100	97	81
Levendahl	257	99	86	72

R. O. T. C. Students Live In Barracks

U. of Michigan Tries Novel Military Plan

By A. C. P.

Forty basic University of Michigan R.O.T.C. students, commanded by three cadet officers, have moved into the bare-walled military barracks of a student dormitory to live under a strict military supervision that requires special passes even for dates.

A West Point in miniature, the barracks were organized by Cadet Col. Charles M. Thatcher, a senior. Purpose of the experiment, which has received full support of University officials, is to give training far stiffer than that ordinarily received in R.O.T.C.

The student soldiers have liberty granted by pass only, and to get that pass they must be caught up on their studies and have no demerits.

Two large rooms in the basement of the East Quadrangle dormitories house 20 men each. Every man is supplied a bed, chest of drawers and a clothes locker. A study room is situated between the sleeping quarters. The men eat in the regular dormitory dining rooms, although the cadet officers, directly responsible to Thatcher, live separately in an adjoining room. Room rates are \$40 a semester as compared with \$75 for regular students.

Munroe Defeats Senior House As Wood Humbles Hayden In Hoop Tourney

Fencing Meet With B.U. For Sat. Is Cancelled

The scheduled fencing match with the Boston University Terriers which was slated to be held tomorrow afternoon at 2:30 o'clock at B.U. has been cancelled according to an announcement by Larry Churchill, manager of the fencing team. In their last match with the Terriers the Beaver squad won by the overwhelming score of 24-3.

The next scheduled match for the swordsmen will be held on February 27 against the Dartmouth Indians in Walker Memorial.

Pucksters Down Swampscott Team In Practice Fray

Boston Arena Cancels Scheduled Game With Tufts Tuesday Night

The M.I.T. hockey team took Swampscott Crescents into camp Wednesday night with an 8 to 6 win. The lineup was much changed from the team that trimmed Boston University 7-2. Kaneb and Noreen were two of the names that were noticeably missing. Also the presence of Larry Button, last year's freshman goalie, was evidence of the fact that the team has lost many of its experienced players.

An interesting fact about the game is that the manager and spare for the Crescents was Larz Andersen, '36, a star on the hockey teams at Tech during his college days.

The lineup:

Crescents	M.I.T.
Keefe	L.W. Bettis

The game with Tufts for Tuesday has been cancelled by the Boston Arena, and therefore there will be no practice Monday morning.

Kappa Sigs Stop Betas By Count Of 46-16 On Wed.

The dormitory basketball tournament to eliminate teams for the round robin Beaver Key tourney got off to a fast start with Munroe trimming the Senior House 32-23. Maher was high scorer of the winning team with 10 points, while Butler got the red eight for the Senior House. Munroe showed possibilities for a first rate team with a little experience.

Wood proved to be a team to watch when it overwhelmed Hayden 34-17. Meny and Kulesa starred for the winners, scoring 13 and 12 points respectively. The Wood team is fast and may sweep through the dormitory series if the other teams fail to improve rapidly. Hayden has a high scorer in Martin who scored 10 points.

According to Ken Rehler, dormitory athletic chairman, the four dormitories which have not yet been taken over by the Army will run two playoff games per week.

Kappa Sigs Take Fraternity Game

The Kappa Sigma basketball team rolled over a Beta Theta Pi team that sorely lacked practice. The Kappa Sigs were not a well drilled team, but found it easy to get under the Beta's basket and drop in the soft ones. Massing a total of 46 points to the opponents 16, the team showed a group of capable players, each man accounting for a bear's share of the scoring. Led by high scorer Bernie Duffy and speedy Dave Brown, the team looks like a formidable foe to any team in the Fraternity circuit.

The Beta Theta Pi team lacked the coordination that comes from practice and experience, but produced some good players, Tom McEvoy, high scorer for the losers, and Peakes. The team should have produced a tighter zone defense; they were especially weak when the opposition worked in near the basket.

Infirmiry List

Students confined to the Homberg Infirmiry last night were:

Edgar Andrews, '46
Alfred E. Beck, Jr., '46
Curtiss H. Elliott, Jr., '46
Robert L. Heaton, '45
David M. Rock, '45
Malcolm L. Schoenberg, '46
Malcolm C. Walker, '43

At the Haynes Memorial Hospital are:

Harold A. Miller, '44
Kenneth G. Scheid, '45
Paul Travers, '43

Voo Doo Sabotage Charge New Blot On Escutcheon

(Continued from Page 1)

photographic evidence appearing elsewhere which shows clearly how an American Sergeant of the Guard was "wheeled from duty and lulled into oblivion" by a typical issue of Voo Doo.

Those Responsible

Among the persons listed in the charge are Gerald Dennehy, '44; Douglas E. Root, Jr., '42; Herman J. Harjes, '44, and Jasper D. Ward, '45; all associated with the publication. None of them could be reached for comments last night.

The major portion of the evidence was provided by the foresight and courageous patriotism of Lieutenant Colonel Donald H. Nelson, United States Army Signal Corps. Efforts are being made to have Lt. Col. Nelson cited for his part in the undertaking, but as yet no progress can be reported.

Was Junior Prom Issue

The particular Voo Doo in question appears to be a copy of last November's "Drink and Be Merry" number, issued especially for the Junior Prom. This issue was not unusually seditious in the sleep-provoking qualities of its attempts at humor, but it will be remembered by the greater portion of students mainly because of the openly bogus dedication appearing on the so-called "personal" picture of Hedy Lamarr, glamorous movie star.

Hoping and praying for the safety of the nation, we await Voo Doo's next issue, hoping they don't go too far—a "humor" magazine should boost morale, and not lead to negligence of duty.

Among Our Alumni Are 37 Generals And 14 Admirals

(Continued from Page 1)

tenth of all the living alumni of the Institute, of all ages, are now in uniform. This is particularly significant when we remember that an enormous number of our alumni are also in civilian positions which are essential to the war effort, positions in engineering design, in industrial production and in research and development of instruments and materials of warfare.

37 Generals and 14 Admirals

Among the Institute's alumni in the armed services are now listed 37 generals and 14 admirals. Among these are Major General James H. Doolittle, '24, presumably in Africa, Lieutenant General George C. Kenney, '11, commanding our Air Forces in Australia; Rear Admiral Emory S. Land, '06, who is in charge of the enormous national program of merchant ship construction; Rear Admiral Julius A. Furer, '05, Coordinator of Research and Development in the Navy, and Rear Admiral Alexander H. Van Keuren, '07, head of the Naval Research Laboratory and former Chief of the Bureau of Ships.

A number of decorations for distinguished service in the armed forces have been awarded to Technology alumni. From the Class of 1907, Major General Lloyd R. Fredendall, Distinguished Service Medal, Africa. From the Class of 1911, Lieutenant General George C. Kenney, awarded the Purple Heart, New Guinea. From the Class of 1913, Brigadier General Albert M. Jones, Distinguished Service Cross and Distinguished Service Medal, Philippine Islands. From the Class of 1917, Captain Forest P. Sherman, Navy Cross, U.S.S. Wasp. From the Class of 1924, Major General James H. Doolittle, Congressional Medal of Honor, Tokyo. From the Class of 1928, Commander Anthony L. Danis, Navy Cross, U.S.S. Kearny. From the Class of 1939, Lieutenant Brainerd Macomber, Navy Cross for Coral Sea, and Gold Star for Midway. From the Class of 1941, Captain Arthur A. Fletcher, awarded the Purple Heart. From the Class of 1942, Lieutenant Charles F. Kelley, awarded the Silver Star for Service in North Africa.

Radio Society Change Passes

Bridge Club Budget Refused By Solons

(Continued from Page 1)

were explained, and the motion was passed.

The changes in the Radio Society, which were also tabled at the last meeting for same reasons as the motion concerning the Baton Society, were passed as the next business of the meeting. These changes were concerned with dues, which were reduced until the society is allowed to broadcast again. This change was made necessary by the F.C.C. ruling banning all amateur broadcasting for the duration.

The Bridge Club budget for the coming year was ruled out of order, as the Undergraduate Activities budget for the year was made up at an earlier date without any allowance for Bridge Club, which had not been formed at that time. This budget therefore requires the consideration and approval of the Budget Committee.

The Senior Ring Committee report of the Class of 1943 was accepted, in order to make it complete for the files of the Walker Memorial Committee. The report consisted merely of the number of rings bought, and was signed by James A. Malloch, Jr., '43, chairman of the committee for his class.

Another item which was delayed from the last Institute Committee under the direction of S. Richard Childerhose, '43, was approval of Dean C. Picton, '44, as the chairman of the Student-Faculty Committee. This committee has charge of handling any disagreements which might arise between the students and the faculty committee. Its chairmanship gives Picton a seat on the Institute Committee.

The last motion of the meeting required the suspension of the by-law regarding publication of the proposed motions in The Tech on the Monday previous to the meetings. The by-law was suspended however, and the election of several members of the class of 1945 to the Technology Christian Association staff was approved.

Ernest T. Schoenwald, '44, chairman of the Elections Committee, was the only member of the Institute Committee absent, and no members were represented by proxies. James P. Buchanan, '44, president of the M.I.T.A.A., and Gerald Dennehy, '44, General Manager of Voo Doo, were late.

Sanitary Engineering Course Discontinued

(Continued from Page 1)

to the S.M. degree in either Sanitary Engineering or Public Health Engineering be vigorously continued under the direction of the Department of Civil Engineering.

These recommendations have been approved by the Executive Committee of the Corporation and will become effective as follows:

Four New Changes

(1) Undergraduate Course XI, Sanitary Engineering, will be discontinued after February, 1944, and no further S.B. degrees in this course are to be awarded. Students at present enrolled in Course XI will thus be able to complete their program.

(2) Except in the Senior Class (June 1943 to February 1944) no additional students will be accepted for Course XI.

(3) The new program in Course I for students desiring to emphasize Sanitary Engineering or to prepare for the graduate year in Sanitary Engineering or Public Health Engineering will start in June 1943 and will be open to students who have completed their Sophomore year in Civil Engineering.

(4) The undergraduate course in Public Health Engineering (VII-T, Option 2) is now discontinued, and no further S.B. degrees in this field are to be awarded. (No students at present are registered in this course.)

Aircraft Identity Methods Improved

Naval Aviation Cadets Benefit By New System

By A.C.P.

A new and improved method of aircraft identification through use of silhouettes projected upon a motion picture screen has been developed at Northwestern University, where it is being used successfully in teaching naval aviation cadets.

The technique was originated by Max Karant, instructor in the university's civilian pilot training program and managing editor of Flying Magazine.

Best Yet

Dr. E. L. Edmondson, director of aeronautics at the university and a former army flier, lauded the method as the "best yet devised for the use of identifying aircraft." The technique has been used in both the elementary and secondary courses and not a single student failed in the final examination on aircraft identification.

Silhouettes of the front, side, and bottom views of 110 different types of the world's fighting aircraft have been drawn to scale and photographed on two-inch slides fitting standard projectors. They can be projected to any desired size.

Efficient, Accurate

In actual tests, the method surpassed in efficiency and accuracy those now used by army and navy training schools. Not only do the silhouettes provide details lacking on plane models, but by projecting the drawings on a screen the instructor is able to teach large classes at a time.

The speed with which the silhouettes can be flashed on and off the screen provides an accurate test of a student's ability to identify planes. Students learn to identify planes when flashed on the screen at intervals of a twenty-fifth of a second or faster.

As a result of the experiments at Northwestern, standard aircraft identification kits containing 325 slides are now available through Flying Magazine for training schools throughout the country.

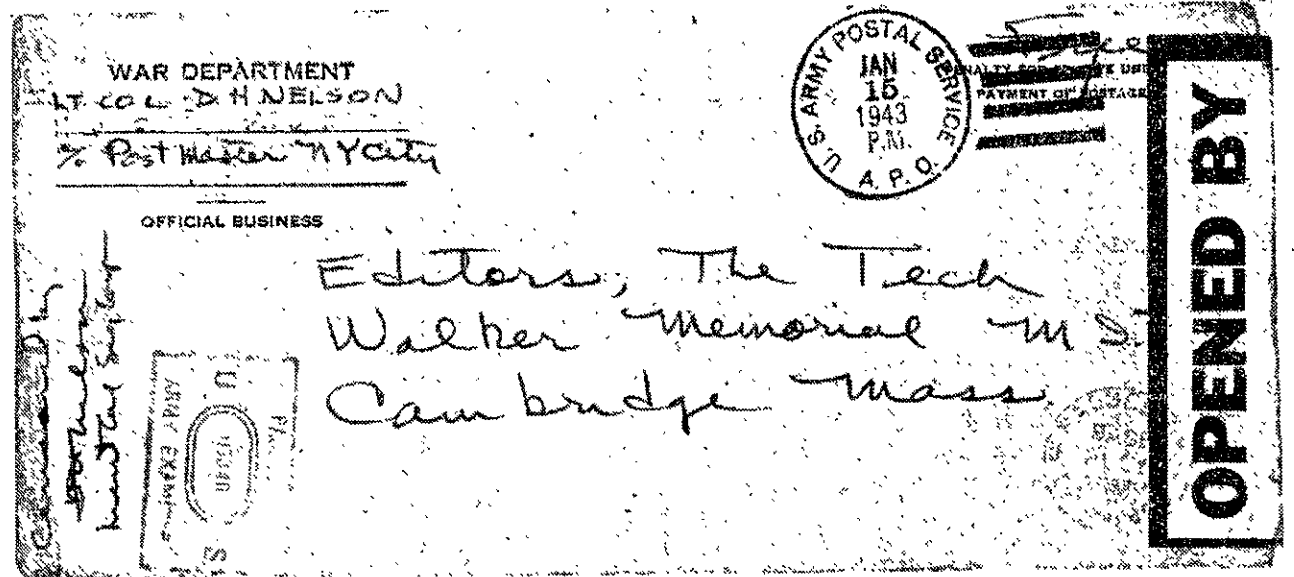

Newspaper Gremlins Cause Of All Of Our Mistakes

(Continued from Page 2)

ture of Mrs. Plantagenet in the spot where a cut of Lizzie the Chimp was supposed to go; the cackling old greeleybums, who cause people to write unintelligible or abusive letters to the editor; the orthogreves, who light on the shoulders of reporters and rewrite men and make them incapable of spelling names right—particularly in the matter of middle initials. The list is long.

We recommend that the Nieman foundation at Harvard, which is studying the problems of journalism, make a definite report on the mergenfellars.

EXHIBIT C

Facsimile of the envelope in which the picture of the Sergeant of the Guard sleeping after reading Voo Doo came to us. It is reprinted here as proof of the existence of such a letter, so the whole thing won't be branded as a figment of The Tech's imagination.

Meteorologists To Report Soon For Active Duty

Prof. Mitsch Releases Names Of Course "B" Men To Report March 1

(Continued from Page 1)

concerns ended the last week in January.

To Get Basic Training

According to the A.C.E. the men will then be sent to one of seven basic training centers which are under the direction of the Army Air Forces Technical Training Command. After their basic training for from one to two months at these centers, some of the men will be sent to the various Flying Training Command Classification Centers. The balance of the men will go to designated colleges for specialized training prior to flight training.

The selection of these men will be on a basis of educational tests, and the evaluation of their total educational background. The college training course will be of five months duration, but may be shortened for some depending on the educational level of the students, and the needs of the Flying Training Command.

The Training Course consists of five subjects: 60 hours of English, 60 hours of Geography, 60 hours of Mathematics, 60 hours of History, and 180 hours of Physics. Included with this will be 10 hours of Flight Instruction under the direction of the Civilian Pilot Training Program, and a limited number of hours of drill and physical training. Although it is not required, the Air Forces suggests that men bring with them a copy of the transcript and qualitative summary of their education, as this will aid the army in classifying and assigning men.

Twenty More Called

In addition to the thirty-three men announced as being called to the Meteorology "C" course by the Army Air Forces in the last issue of The Tech, twenty students have received their orders to report on March 1 at Fort Devens prior to entering the Meteorology "B" course. Of these men two were members of the Class of 1946, while the remaining 18 were members of the class of 1945. The freshmen called were Richard D. Grisdale, and Joseph D. Pigett. The Sophomores were: William W. Barton, Walter R. Connell, Peter J. Davis, Martin L. Haas, George M. Keller, Jr., Dwight E. Norris, Donald L. Oetter, Richard M. Sweeney, Clifford C. Ham, Jr., George L. Hossfield, Jr., William G. Krutzsch, Jr., William A. Lockwood, Max F. Means, Theodore J. Morelli, Edwin A. Rosenberg, Irving L. Schwarz, Woodward D. Bachman, and John E. Fries, Jr.

Newspapers Need Experienced Men

Journalism Schools Fail To Meet Shortage

(Continued from Page 2)

paper personnel shortages, together with a cross-section survey of the weekly field by Walter Crim, publisher of the Salem (Ind.) Republican-Leader, will be sent to Director Paul V. McNutt of the manpower commission.

Speed Needed

Members of the council, representing various newspaper publisher associations, together with journalism school representatives, recommended that journalism schools accelerate their programs to one- or two-year courses to help alleviate the manpower shortage, but the council cautioned against lowering professional standards.

The council further recommended that various newspaper associations ask their respective members to suggest to journalism schools likely adult students for these special wartime courses.

Ralph Nafziger, University of Minnesota school of journalism, reported on the effect of war on journalism enrollments and graduates to be available in 1943. His report indicated a drastic shrinkage of men students with a decided ponderance of women, until the beginning of the war a problem in most schools of journalism. Prejudice against hiring women is rapidly disappearing from newspaper offices, it was stated.

New Courses

Charles E. Rogers, head of the technical journalism department of Iowa State College, reported on the impact of war on curricula of schools of journalism. "A number of schools are offering new war courses, or have modified existing courses, to give emphasis to new problems, opportunities or needs of the press occasioned by the war," said Prof. Rogers. "No practical courses, such as reporting or copyreading. The continuance of one practical type course, press photography, was threatened by scarcity of materials caused by priorities for the armed forces."

Also in attendance were members of the American Association of Schools and Departments of Journalism. This group held an informal meeting, at which Vice-President John Stempel, Indiana university, presided. The group approved the actions taken by the national council and pledged its cooperation with the newspaper publishers in helping to meet wartime emergencies.
